## Senior React Developer

**Dynamic Senior React Developer** with **5+ years** of experience in designing and delivering **scalable, high-impact web applications**. Expert in **React JS, Redux, and Next JS**, specializing in front-end architecture and **RESTful API integration**. Proven ability to **lead cross-functional teams**, mentor developers, and leverage modern practices to optimize performance and drive business growth.

### CORE COMPETENCIES

Technical Feasibility Analysis | Architecture Design | API Integration | Feature Development | Code Optimization | Bug Fixing | Deployment Strategies | Cross-Functional Team Collaboration | Stakeholder Communication | Documentation & Reporting | Code Migration | Legacy System Integration | Prototyping | User Feedback Implementation | Scalability Planning | Refactoring Legacy Code | Custom Component Development | Error Handling & Debugging

### PROFESSIONAL EXPERIENCE

**Evamp & Saanga | Islamabad, Pakistan**

**July 2022 – Present**

**Senior React Developer**

- Led the development and front-end strategy for the Dealer Management System (**DMS**) team, working with the international telecom operator **SALAM (KSA)** in managing its expansive sales network.
- Worked on **BSMS (Ufone)**
- Developed and implemented user interaction designs to enhance web page engagement and usability.
- **Developed a multi-level channel Hierarchy system** enabling onboarding and management of sales channels across various levels with dynamic navigation and tree-view visualizations.
- **Built an advanced user-management module**, supporting mobile app users with role-based access control and several configurations.
- **Designed and implemented a sophisticated commission configuration engine** that calculates and manages commission for multiple dealers with support for different commission types (SIM Activation, recharge, e-top-up)
- **Implemented a SIM inventory and management system** including SIM card assignment to users, inventory tracking, return functionality and detailed SIM sale report.
- **Created a complete wallet management system** featuring wallet refill, bulk disbursement with scheduler timer.
- **Developed an extensive reporting and analytics dashboard.**
- **Implemented a comprehensive SIM Inventory and assignment system.**
- **Designed channel Transformation system** enabling transfer among channels.
- **Developed a complete Device sales solution module**, managing the entire process from initial device configuration and inventory tracking to final assignment to the end-user.
- Ensured cross-platform compatibility and mobile responsiveness to maximize application accessibility.
- Partnered with the UI/UX team to integrate sophisticated web design features, resulting in improved cross-functional coordination and successful project execution.
- Consulted with clients to establish and refine requirements and performed detailed testing to ensure alignment and achieve maximum client satisfaction.

- Supervised and mentored a team of two developers to drive project excellence and support their professional growth.

**Target Energy Solution | Islamabad, Pakistan**  
**Front-end Developer**

**Nov 2021 to July 2022**

- Developed and maintained front-end components for various oil and energy sector products, achieving a 60% improvement in user interface performance and usability.
- Developed a centralized component library that was adopted across 4 product lines, reducing redundant code by 40% and cutting feature development time by 20%.
- Translated wireframes and design documents into modular, reusable code, accelerating the development process by 15% and ensuring high-quality, maintainable code.
- Analyzed project specifications and devised technology solutions that consistently exceeded customer expectations, leading to a commendable increase in positive client remarks.

**JMM Technologies | Abbottabad**  
**Front-end Developer**

**May 2021 to Aug 2021**

- Collaborated in all phases of the systems development lifecycle, from requirements gathering to production release, ensuring timely and successful project delivery.
- Coordinated with project managers to set realistic and ambitious coding milestones, enhancing pre-release software development and consistently meeting project goals ahead of schedule.
- Leveraged advanced expertise in React state management strategies to optimize application performance and maintainability, leading to a real-time reduction in bug reports.

**CodeSauces | Rawalpindi**  
**Junior Front-end developer**

**Oct 2019 to May 2021**

- Engineered UI components using React, Reactstrap, and other front-end toolkits to enhance user interface efficiency and overall user experience.
- Implemented robust authentication, login, signup, and authorization features to strengthen system security and streamline user access.
- Collaborated in debugging and troubleshooting front-end issues, performing code reviews, and optimizing application performance.
- Engaged in the integration of front-end components with back-end services to ensure seamless functionality.

## PROJECTS

- ❖ **B2B App:** Developed a web application using React, Ant Design, and Redux to generate detailed activity reports, significantly improving data visualization and reporting efficiency. Designed a scalable front-end capable of handling thousands of data points efficiently.
- ❖ **Directrent:** Developed a rental application for the U.S. market using React.js and Redux, providing a seamless property management experience.
- ❖ **Student Admission Portal:** Automated the student admissions process through a React-based web app, utilizing Laravel and Inertia.js for efficient handling and streamlined processing.
- ❖ **SIS:** Contributed to a SaaS-based Student Information System, enhancing UI/UX with Inertia.js, MUI, and Ant Design to improve user interaction and accessibility.
- ❖ **DMS:** Independently developed and maintained a web application for dealer management, taking full responsibility for the project. Utilized React, Redux, Material-UI, Formik, and React Query to optimize workflows and enhance performance.

## EDUCATION & CERTIFICATIONS

Bachelor of Science in Software Engineering, University of Engineering and Technology, Peshawar

JavaScript (Basic), HackerRank (2023) [View Certificate](#)

JavaScript developer, HackerRank (2021), [View Certificate](#)

React and CSS (Basic), HackerRank (2021), [View Certificate](#)

Certificate of Excellence (Employ of the month), October 2025

## LANGUAGES

English | Urdu | Pashto

## TECHNICAL SKILLS

**Front-end frameworks and libraries:** React.js | Next.js | Inertia

**UI Toolkits:** | Radix UI | MUI | Ant Design | Tailwind | Bootstrap | Reactstrap

**Form Handling and Validation:** React Hook Form | Formik | Zod | yup

**State Management:** Redux, Redux toolkit (RTK), Middleware

**Styling:** CSS | scss | styled components | Tailwind CSS | CSS Modules

**Data Fetching/Caching:** Fetch | Axios | React Query

**Back-end & Runtime:** Node.js | Express

**Version Control:** Git | GitHub | Gitlab | Bitbucket

**Deployment & Tools:** Tomcat | Vercel
